FINMA is sceptical towards relaxation of the requirements for mortgage lending. It sees that the Ukraine crisis can pose major risks for the financial sector and individual institutions but does not think it being a major risk for the financial centre as such. **Info:** Media Conference and Annual Report: [DE FR IT EN](#) and AFBS Summary: [LINK](#)

SBA rejects the draft legislation on introducing the Trust in Swiss law. It criticises the proposal for its fiscal aspects which assimilate the trust to a foundation and therefore would lead to unfavourable tax treatment in the international comparison. The proposal is particularly delicate as it would apply Swiss regulation to any trust with a Swiss nexus, including pre-existing structures set up abroad. **Info:** [DE](#)

Promote Switzerland as a Trusted Place for Data Storage

The Federal Council intends to strengthen Switzerland as a place for the safe storage of data and for the assurance of the owner's full sovereignty over data. It wishes to introduce regulation with that scope. The measures encompass the drafting of a code of conduct governing the management of data spaces; define interoperability between single data spaces; promote the emergence of trusted data spaces at the international level.
